Hi Gloria,

I received your voice mail and was unable to call back yesterday. I am tied up in meetings all day today as well. Can we talk on Monday? I am currently completely open except for 1-2:30pm EST. Please let me know when it's best to call you.

If Monday doesn't work Tuesday 8-12am EST is also open.

Thanks

Ephi Gur

Hi Gloria,

Have you received this submission? Can you give me an estimate about the next step?

Hi Gloria,

I just left you a message to inform you that a submission has been made through CDX providing more information about the controlled release, collection and disposal of the chemical. There is also, information about the environmental fate of the chemical as well as some quantitative numbers the agency can use in their risk assessment.

Please feel free to contact me if you need more information or clarifications.

All the best,

Ephi

Hi Gloria,

I am sorry about yesterday. You happened to call back a few minutes after I left a message so I assumed you are indeed returning a call. We are still very interested in understanding how we can mitigate the concerns raised. You suggested a call with one of the engineers. We would need to coordinate that with a few entities in different time zones on our end which why I thought a quick "pre call" to discuss the logistics would make sense. If you have another suggestion please let us know.

Hi Gloria,

I hope the shut-down concern is over. Could you let me know when (assuming it is indeed over) you will have time for us to call you next week?

Hi Gloria,

I am flying to Europe on Monday. I could try to have our technical guy in UK call you or we could try to set a 3 way call on Tuesday after I arrive. I understand this will just be a clarification call to see who should attend the actual call – correct?

Would Tuesday around 10am work for you?

Sure. I assume it would be just with the engineer? RAD is very busy, so generally before a meeting, I like to talk to the submitter and make sure we are on the same page with what is needed. Should we talk Monday morning?

Hi Gloria,

Our clients would like to set a call and discuss the engineering control mitigation measures. Since we also have people in UK that may join the call could we try to find a time in the morning (8-12 am EST) hours that's acceptable to you?

If you could give us a few possible dates and times for the week February 18th I'll circle them around and see if we can set up a call.

Will that work for you?

Hi Gloria,

I left you a voice mail message.

Our clients are under internal pressure and trying to address the concerns you have. Since all attempts to Fax the document failed and for some reason the hard copy has not been mailed can we find a way for you to hand deliver it to a messenger that we will arrange? Our Clients would also like to try to arrange for a call with you to discuss next steps. Could that be set up?

Thanks in advance for your prompt response,

Ephi

Hi Ephi,
Are you available to talk Monday morning. I took some time this weekend to really review your case. We have some issues with some of your releases and hopefully when we talk, we can find ways of addressing some of these issues.

Best,
Gloria

Hi Ephi,
I have not tried it today yet but I saw that the fax machine said yours was busy. I'll try it one more time today. Should I try it now?

Best,
Gloria

Hi Gloria,

I've just left a voice mail asking whether you have sent the fax and verifying that you have the correct number in case you did. I just double checked and it is indeed the number I gave you : 732-873-3203. If you have not sent the report yet, do you have an ETA for it by any chance?

Thanks and talk to you soon.,

Ephi

Hi Ephi,

Thank you. It will take about a week to get your sanitized documents to you. At that time, I can send the fax to the facility in NJ. Do you have the number?

Best,
Gloria

Dear Gloria,

Thanks for calling me today and suggesting to fax us the engineering report for our review. The finance department at our facility in NJ have a working fax that they maintain and is secure. If you could fax the report to them for the attention of Laura Gubernot that would be highly appreciated.

Thanks and please let me know if you need any additional information.
